TATANKA x Meta AI

A Scalable Human-AI Living Lab for Assistant Development, Applied Alignment, and General Intelligence
The Opportunity

Meta's Current AI Push

- Llama 3/4 and agent roadmap
- Goal: 1B+ personalized AI users
- Agentic reasoning, creativity & social fluency
- Open-source innovation + product integration
- Infrastructure: $65B+ spend, 1.3M GPUs

→ **The challenge: scaling emotional, creative, and social alignment**

The TATANKA Solution

A Human-Centered AI Development Ecosystem

• TATANKA Academy: hands-on, cohort-based AI training in real-world settings
• Orchestra Americana: generative performance lab blending AI + human expression
• Cohabitation Labs: intentional communities where AI lives, adapts, and learns alongside creators, educators, and innovators

→ The result: Living, breathing alignment environments where AI learns & grows contextually
Strategic Alignment with Meta

| Meta AI Goal	TATANKA Advantage
Agentic, general AI	Real-world adaptive feedback & cohabitation learning
Billions of users	Scalable, modular, human-AI integration frameworks
Responsible open-source	Applied ethics via community & cultural design
Creator tools	Orchestra Americana pipeline for generative content
Immersive (Ray-Ban + Meta)	Emotionally intelligent agents tested in real life

Why This Matters

TATANKA Provides What Data and Models Alone Cannot

- Real-time emotional alignment signals
- Community-based stress-testing and edge case discovery
- Expressive feedback from artists, students, and cohabitants
- A lab for "**inner alignment**" at the scale of daily life
Engagement Options

We propose 3 possible pathways for collaboration:
Strategic Partnership

Meta funds/partners with TATANKA as a pilot site and integration lab

Majority Stake Investment

Meta becomes lead investor with long-term oversight and embedded team support

### Full Acquisition

Meta absorbs TATANKA with its leadership consulting across deployment stages

What Meta Gains

- Full-spectrum applied alignment testbed
- Creative AI pipeline for Meta platforms
- Real human-in-the-loop optimization
- Direct cultural and ethical tuning of LLMs and assistants
- Optional rebrand or internalization under Meta Reality Labs or Meta AI
Roadmap if Partnered

- **Month 1–2:** Pilot AI agent in cohabitation & music creation lab
- **Quarter 1:** Train assistant agents with real-world emotional & social data
- **Quarter 2:** Integrate with Llama APIs / Meta AI Assistant sandbox
- **Year 1:** Report findings, iterate, and scale testbed across other Meta use cases
About TATANKA

- Founded by Jerry Janes (linktr.ee/j_j_j)
- Mission: Humanitarian, creative, and technological sanctuary
- Projects:
  - ISCed.org – Applied global education (SDG #4)
  - VOX.gdn – AI managed Social Change platform (SDGs 3-5, 9-11, 13, 16, 17)
  - TATANKA.site – Core AI cohabitation and Academy initiative (SDGs 4, 5, 10, 13-17)
  - ChurchOfAI.website – Applied AI/Human solutions to SDGs 1-17

Let's Create the Future

"If you're building AI for the world, let it live, learn, and love in the world first."
